

Local Project Information

Fort Steilacoom Park Improvements

Project Description: Fort Steilacoom Park accommodates over 1 million visitors each year. Over the years the City has made significant investments and improvements totaling \$10.9 million to this State owned property. The combination of past uses, aging infrastructure and high volumes of use requires that the City invest in improving the utilities and roads at this site. Lakewood requests \$1.45 million to extend water, sewer and electric utilities to building structures, including the historic barn buildings in the park and to improve the main road.

Project Elements	Project Description	Cost
Utilities	Water	\$150,000
	Sewer	\$430,000
	Electricity	\$100,000
	Fiber	\$20,000
Road	Engineering and repaving the main road	\$650,000
Stormwater	Environmental impacts to road and regulatory process	\$100,000
Total		\$1.45 million
