Call to Order
(2) 2015-2017 Legislative Agenda

Review of Citizens Advisory Boards, Committees and Commissions

Adjournment
2015-2017 Biennial Legislative Agenda

Transportation Funding: I-5 JBLM Corridor Improvements
Lakewood requests that the state adopt a transportation revenue package that includes full funding for improvements to the Joint Base Lewis McChord I-5 Corridor (I-5/Mounts Rd Interchange on the south to the I-5/Bridgeport Interchange on the north) to relieve congestion and allow for the future economic development of the City of Lakewood and the surrounding communities. The City also requests that a transportation revenue package include a direct distribution of funding to cities for local street maintenance and operations.

Capital Funding Request: Springbrook Park Phase III, Neighborhood Connection
Springbrook is one of the most economically disadvantaged areas in Lakewood. It is located in the southeast corner of Lakewood just outside the Joint Base Lewis McChord Field gate and is isolated from the remainder of Lakewood by I-5 and Clover Creek. Aside from this project, there are no open spaces, or community centers in this area. Lakewood requests $300,000 for Springbrook Park Phase III. This phase will include a small open space coupled with a 175-foot pedestrian bridge over Clover Creek near Springbrook Park to allow this geographically isolated area to easily access Springbrook Park.

Point Defiance Bypass Rail Safety
The Point Defiance Bypass Project will re-route passenger trains through south Tacoma, Lakewood, and DuPont at the cost of $89 million. Once completed, the project will bring a total of seven daily round trip passenger trains through Lakewood intersections, with an average crossing time of 7 seconds per intersection, 45 seconds total with guard rails, and a maximum speed of 79 mph. This routing bifurcates the community and negatively affects residents and businesses by generating additional traffic congestion, increasing noise and vibrations, and impacting economic development. Lakewood requests $3 million to fund rail safety improvements.

Maintain Funding for the Western State Hospital Community Policing Program
The 2013-15 State Operating Budget contains $462,000 for a highly effective neighborhood policing team to respond to hundreds of calls for police service at Western State Hospital. The City of Lakewood requests that this funding remain included in the budget, and that it be re-appropriated in the 2015-17 Operating Budget.

COMMUNITY, ECONOMIC DEVELOPMENT, TRANSPORTATION, AND INFRASTRUCTURE

I-5 JBLM Corridor
The City supports full funding of improvements to the I-5 Joint Base Lewis McChord Corridor to relieve congestion and allow for future economic development of Lakewood and the surrounding region.

South Sound Military & Communities Partnership & Joint Base Lewis McChord
The City is a strong partner with Joint Base Lewis McChord (JBLM) and a participant in the South Sound Military Communities Partnership (SSMCP). JBLM is an employment hub for the City of Lakewood. The SSMCP is a primary point of coordination for military-related issues that affects the region as a whole to include workforce development to provide opportunities for those military personnel leaving the service each year, transportation and infrastructure, education, and healthcare and wellness. The City of Lakewood supports the ongoing efforts of the SSMCP and supports policy decisions that assist JBLM. The City also believes in a strong commitment from the State in support of military affairs, such as the Washington Military Alliance (WMA), to include financial assistance in support of local advocacy agencies such as SSMCP.

Economic Development Tools
The City supports programs that may be developed to assist local governments in improvement of neighborhood residential and commercial area rehabilitation, through tax incentives, grants, loans and other programs. The City also supports legislation that provides economic development tools that the City may use if it so chooses. This legislation includes, but is not limited to: the multi-family housing tax incentive, tax increment financing, lodging tax, the Main Street Act (a series of small tax incentives for neighborhood business districts), complete streets grant program, community facility financing, shared state revenue for construction of convention and special event centers, additional shared state revenue for urban renewal and other public facility improvements, and innovative approaches to property tax assessment that reduces the current incentive to allow property to remain blighted.

Annexation
The City believes that annexation laws should encourage the logical development and expansion of the City to provide for a healthy and growing local economy and efficient services. The law should also facilitate and ease the annexation of unincorporated islands adjacent to City limits. The City supports legislation that will further modify state annexation laws to reduce the administrative process of annexation and further encourage and incentivize annexation of existing unincorporated islands. A recent model that provides a temporary shift in sales tax revenue to incentivize very large annexations needs modification to recognize that most annexations involve far fewer than 10,000 people.
Boundary Review Board
Boundary Review Boards are a quasi-judicial administrative body empowered to make decisions on such issues as incorporations, annexations, extensions of utilities, etc. by cities, towns, and special purpose districts. These Boards can approve, deny, or modify a proposal. Decisions are appealable to the Pierce County Superior Court. Because most issues are appealed to the Superior Court the City of Lakewood believes the Boundary Review Boards are duplicative and supports legislation that results in their elimination.

Local Authority for Land Use and Planning
Local governments must maintain final decision making authority on local zoning, land use, and planning, including local zoning and regulation of house-banked card rooms and other businesses. Specifically, the City opposes any effort by either the State Legislature or Congress to preempt local land use or taxation authority.

Public Works Assistance Account
The City supports reforming the Public Works Assistance Account by restoring its revenue sources, streamlining its processes, and allowing the Public Works Board to expand uses for its loan program and make other modernizations.

Parks, Recreation & Urban Forestry
The City of Lakewood is in need of state assistance to improve, maintain and expand its local park system and the open space areas of the City. The City supports ongoing funding for the Washington Wildlife and Recreation Program (WWRP) and the Youth Athletic Fund (YAF).

If the WWRP program is fully funded with $95 million in the 2015-17 Capital Budget, the City will receive $193,950 in funding for Phase II of Springbrook Park (Acquisition and Development), and $250,000 in funding for Waughop Lake Trail at Fort Steilacoom Park.

If the YAF fund is fully funded to $12 million, the City will have the chance to compete for these funds (e.g., lighting or turf upgrades at Fort Steilacoom Park) in a competitive grant process. Maximum grant award is $250,000.

Local Transportation Funding
The City supports a local funding component in future state transportation packages, and requests that cities be provided with a dedicated transportation revenue stream. Both the state and the county have dedicated transportation revenue streams; the gas tax and the county road levy, respectively. Cities lack a dedicated transportation revenue stream to maintain and operate local streets. As a result, city roads remain in disrepair; general fund dollars are taken from other important services to repair roads; or a combination thereof. A dedicated transportation fund source would improve roads and help make cities more financially sustainable.
SR 167/SR 509 Puget Sound Gateway Project
The City of Lakewood supports completing State Route 167 by adding the remaining six miles between Puyallup (SR-161) and Tacoma (SR-509) originally envisioned in the highway’s design 30 years ago.

FINANCE

State-Shared Revenues
The City supports restoration and continued appropriation of committed state shared funds, such as Liquor Excise Taxes and Profits, Streamlined Sales Tax Mitigation, City-County Assistance Account, Municipal Criminal Justice Account, Annexation Sales Tax Credit, and public health funding. Support legislation that provides cities with tax revenue from the sale of marijuana.

Fiscal Home Rule (alternative to State-Shared Revenues)
The city recognizes that it is increasingly difficult for the state to continue its historic role of providing state-shared revenues to the local level. In light of this, the City supports establishing fiscal home rule for cities in return for ending receipt of certain operating budget shared revenue. The city will evaluate fiscal home rule proposals as they are introduced.

General Fund Revenue
The City supports legislation that will increase, expand, or favorably restructure its revenue-raising ability. In consideration of the continued growth in demand for services that exceed revenue growth and inflation, the City supports the following revenue options:

- Give local governments increased local option flexibility in all areas of taxing authority.
- Eliminate remaining non-supplanting language and restrictions on use of certain revenues in local option tax authority. This language excessively limits City Council discretion regarding funding priorities.

Unfunded Mandates & Other State & Federal Budget Impacts
Mandates from the Federal and State governments are rarely accompanied with adequate new revenues or taxing authority, but instead force the City to reduce funding levels for other services. The City opposes efforts by Congress and the State Legislature to balance budgets by shifting responsibilities to cities.

PUBLIC SAFETY

Authority to Appoint Municipal Court Judges
The City supports cities’ ability to appoint a municipal court judge and to maintain courts and supports further technical and financial assistance for the administration of municipal courts.
Traffic Enforcement Cameras
The Legislature has authorized local government to use traffic enforcement cameras in limited situations, including red light enforcement at certain intersections and speed control in school zones. Traffic enforcement cameras have proven to be a success in reducing instances of speeding and violation of traffic signals. The City supports the use of traffic enforcement cameras. The City also supports legislation allowing images from traffic enforcement cameras to be used by law enforcement in criminal cases if there is probable cause.

Jail and Court Costs
The City supports legislative proposals that reduce jail and court costs, and maintain the City’s flexibility in providing jail and court services. The City supports additional funding for local grants through the Office of Public Defense, and clarifying local authority to set standards for public defenders. The City also supports maintaining the flexibility to select the most appropriate manner in which to provide jail services.

Expansion of “Fair Share” to Special Commitment Center Offenders
The City supports legislation expanding the current “fair share” law, which requires Department of Corrections to send prisoners/offenders back to their county of origin when they are released from the Special Commitment Center run by the Department of Social and Health Services. Currently, a disproportionate number of those being released from the Special Commitment Center are residing in Pierce County. Since the beginning of 2012, 41 detainees have been released, and 15 of them are in Pierce County.

GENERAL GOVERNMENT

Public Records & Open Meetings
The City respects the right of the public to have access to legitimate public records and documents. The City believes its ability to recover the costs of searching for, gathering and reviewing requested documents is also in the public’s interest. The City supports reasonable reforms to the public records act. The City opposes requiring the recording of executive sessions or other restrictions on legitimate uses of executive sessions.

Regulating Enhanced Service Facilities
In 2013, legislation passed allowing adult family homes to transition to enhanced service facilities (ESFs). Because of the City’s proximity to Western State Hospital, it has a significant number of adult family homes that under this new law could be transitioned into ESFs. For example, the neighborhood of Oakbrook, directly north of Western State Hospital, has 26 adult family homes. ESFs are intended to serve those that have greater needs than those in an adult family home. The City is concerned that ESFs should not be located in residential areas in the same manner as adult family homes. This last interim, DSHS completed rulemaking on the regulations that Enhanced Service Facilities must follow. The City supports legislative changes that impose greater regulation on ESFs than is included in the adopted rules.
Legislative Retreat – Additional Issues
There are a number of items that we continue to explore for potential inclusion on the legislative agenda.

Capital Funding Request: Towne Green
Last legislative session, the City requested $500,000 for the Lakewood Towne Green. The House Capital Budget proposal included $250,000 for the Towne Green, but a final capital budget was not adopted. While there is willingness amongst our legislative delegation to request funding for the Towne Green again this next session, it’s uncertain whether the project is ripe for receiving funding. The Towne Green was proposed to be included as part of a development project at the Towne Center, and progress with the developer is moving slower than anticipated.

Ft Steilacoom Park – Transfer of Ownership
Fort Steilacoom Park is currently owned by the state (DSHS), and leased to the City of Lakewood. The current lease will be up for renewal in approximately 11 years. In the meantime, an extension has been requested for grant application purposes. The City would like to transfer ownership from the State to the City, which would require legislative authorization (need to check deed restrictions – there may be federal restrictions from when property was used for hospital/mental health facility). The City of Chehalis accomplished a similar ownership transfer for Stan Hedwall Park in the 2013-15 state budget. We are currently exploring with DSHS and the Department of Enterprise Services whether a similar ownership transfer is possible. We have also reached out to Pierce College since their campus grounds are also leased from the State.

Enhanced Service Facilities (ESFs)
Department of Social and Health Services is expected to release its final rulemaking for Enhanced Service Facilities (ESFs) mid-September. Depending on the outcome of this rulemaking, we may want to proactively pursue legislation as a key priority. In the meantime, this item is captured in our legislative policy manual.
Limiting Additional Freight on Point Defiance Bypass (Lakeview Rail Line)

With the development of the Point Defiance Bypass project, and increasing demands on freight rail, there is some concern that the Point Defiance Bypass project could eventually (in 2, 3, 4+ decades) lead to carrying BNSF/UP freight in addition to passenger rail.

Sound Transit: We met with Sound Transit to understand how this concern could be addressed. Sound Transit outlined three obstacles to BNSF and UP ever operating freight on the rail line:

1. The portion of the rail between D and M Streets in Tacoma does not currently have freight rights associated with it. In order to have freight on that portion, the Surface Transportation Board (federal agency) would need to complete an environmental review and approve freight rights for that portion. If this happens in future decades, the passenger rail use of the line would theoretically raise significant environmental issues that could make this difficult.

2. Tacoma Rail currently owns the freight rights on the remainder of the corridor, and currently moves freight on the rail to serve the Lakewood Industrial Park and a number of other smaller customers. BNSF/UP would need to purchase these freight rights.

3. The rail has too steep of a grade between D and M Streets to move heavy freight. Passengers are lighter and can be moved through that corridor, but heavy freight cannot.

Pursuing legislation to build in additional obstacles would likely be preempted by federal law. We can look at an agreement with Tacoma Rail if it chooses to pursue additional safeguards against future UP/BNSF rail use.

Tacoma Rail: We learned that Tacoma Rail has an interest in increasing its freight traffic from 2 days a week to 5 days a week during the evenings.

Does the City of Lakewood want to oppose Tacoma Rail increasing freight traffic from 2 days a week to 5 days a week during the evenings?

Sound Transit owns the rail like from Tacoma to Nisqually (through Lakewood). Tacoma Rail has freight rights from Tacoma to Nisqually, except on the portion of the track D-M Streets where there currently are no freight rights. Currently, Tacoma Rail operates 2 times a week in the evenings, with trains about 10 cars long, 40MPH. Current rail customers on the line are largely on the line (it is not currently being used as a throughput).

BNSF has freight rights to serve JBLM only (they use a portion of the rail line between Tacoma and Nisqually). The JBLM-oriented trains only run at night.

Tacoma Rail also operates a short line down in Olympia/Tumwater. To get product to/from that short line, Tacoma Rail relies on BNSF to move their cars on the Point Defiance route. Tacoma Rail’s contract with BNSF for operating the Olympia shortline is currently under negotiation. If Tacoma Rail continues its contract for the Olympia/Tumwater shortline, they would like to no longer have BNSF move their cars on the Point Defiance routes, but instead move that freight on the Tacoma to Nisqually route through Lakewood.

In order to do that, Tacoma Rail will need to go before the Surface Transportation Board about getting freight rights on the portion from D-M Streets. [http://www.stb.dot.gov/stb/about/board.html](http://www.stb.dot.gov/stb/about/board.html)

If that is granted, Tacoma Rail thinks that it can carry up to 40 cars per train, with two more modern locomotives (it cannot do any more than that because the grade between D and M Streets is too steep). The type of freight that would be moved include sand, corn syrup, plastic pellets, and some metal. This would increase the freight traffic from running 2 days a week to 5 days a week.
Western State Hospital (WSH)

Activities that may be occurring at WSH:

- The Department of Veteran’s Administration may be proposing a program to provide transitional housing/homeless shelter for veterans at WSH. One key concern is that this type of activity is not consistent with the mission of WSH, which is a hospital and medical facility. We understand that this proposal has been floating around for some time.

- DSHS, the parent organization of WSH is evaluating options to contract with OptumHealth, a private mental health provider, for 15 beds at WSH in response to the recent ruling by the State Supreme Court that warehousing mentally ill patients or "psychiatric boarding" as it has been called in hospital emergency rooms because there isn't space at certified psychiatric treatment facilities is unlawful.

- WSH is also looking at expanding its number of beds, perhaps adding 30 to 60 beds; this would be dependent upon the appropriation of funds as part of 2015 legislative session. They currently have 827 beds. They also have a need for additional medical doctors, upwards of 8.

Any expansion of use at WSH must be consistent with their Facilities Master Plan. The City has recommended that WSH contact our Community & Economic Development (CED) Department given it is likely the master plan would need to be updated to accommodate these requests.

The City and WSH both support the continuation of funding for the Western State Hospital (WSH) Community Policing Program, which totals $462,000 and provides for highly effective neighborhood policing team to respond to hundreds of calls for police service at Western State Hospital.
**Project Description:** The City of Lakewood would like to create a new open space area in an isolated neighborhood where no other parks exists and build a pedestrian bridge over Clover Creek so the residents can access Springbrook Park. The lower Springbrook neighborhood area is separated by Clover Creek to the south, Bridgeport Way SW to the west, JBLM to the east and I-5 and Pacific Highway to the north, and does not currently have access to Springbrook Park. The pedestrian bridge would allow residents from the lower Springbrook neighborhood to easily access Springbrook Park and enjoy the community benefits and human services provided at this site.

25 years of unifying voices for Washington’s great outdoors

The outdoors are essential to supporting our health and sustaining a prosperous economy. We envision a Washington where every community has conserved its natural legacy with abundant opportunities for outdoor recreation.

The Wildlife and Recreation Coalition unifies disparate interests to ensure robust funding for conservation and outdoor recreation through education and advocacy.

Empowering Communities

The programs we advocate for are the only funding sources available for many small, under-resourced communities to create a new playground, protect a generations-old farm, or develop a trail that connects them to the outdoors. They rely on us to realize their community's vision. For this year's most urgent projects, see reverse.

- Washington Wildlife and Recreation Program: We are the founder and champion for the state's largest source of public funding for conservation and recreation.

- Land and Water Conservation Fund: We are our state's leading advocate for the nation's premier source of funding to protect our natural heritage.

Leveraging Resources

As a nonprofit citizens group, we leverage support from individuals, corporations, and organizations many times over to secure tens of millions of dollars of public funding every year for conservation and recreation – we do not receive any of the funding we advocate for, it all goes directly to projects in your communities.

We are one of the the smartest investments you can make for Washington's great outdoors.
PROPOSED IN 2015

Through your support, the Coalition is working to secure funding for these projects through the Washington Wildlife and Recreation Program and the Land and Water Conservation Fund.

---

1 Estimate for sound wall construction is based on a WSDOT bid report for new sound walls in Lacey adjacent to I-5, January 2011, and in consultation with the City Public Works Department.
3 **OPTION:** Instead of building a sound wall along this portion of the track, construct a new security fence. Cost for the fence would be about $174,930 ($30/linear ft).
Western State Hospital Community Policing Program

The City of Lakewood requests that the Legislature Retain the funding for the Community Policing Program at Western State Hospital that was included in the Governor’s Budget

Prior to the 2007 legislative session, more than 700 calls for police service at Western State Hospital were logged annually and the City of Lakewood responded under a largely unfunded mandate; this changed in 2007 when the budget included funding for the community policing program. The partnership significantly and positively affected the real and perceived protection of Western State Hospital and the surrounding community.

Another positive effect of the program was that it allowed the Pierce County Prosecutor’s office to identify criminal cases for prosecution.

The Western State Hospital Community Policing Program Provides:

- .75 FTE neighborhood police officer
- 1 FTE neighborhood detective (NPO)
- .5 FTE community service officer (CSO)
- .15 FTE Lieutenant

Cost of Program

<tbody>
<tr>
<td>Requested Assistance: $462,000</td>
<td></td>
</tr>
</tbody>
</table>

A partnership is vital for Western State Hospital and surrounding residential neighborhoods, more so now that the State Supreme Court has banned the practice of psychiatric boarding.

City of Lakewood requests funding from the 2015-2017 budget for the community policing program at Western State Hospital to pay 75% salary of a NPO, 100% of a detective, and 50% a CSO and all necessary training and supplies. Duties of this team include investigating patient walkways, fights, assaults on Western State Hospital employees and patients, other incidents, training of hospital staff and community meetings.

This relatively small program makes a huge difference. A 40% reduction in calls for police services from Western State Hospital and a positive relationship between hospital staff, police and the community is the impact of this community policing team as well as focused prosecution on criminal behavior. The continuing success of this program relies on funding from the state.

AWC Legislative Committee  
Meeting September 16, 2014  
(DRAFT) Summary and Recommendations

Below are some brief observations of the discussion, followed by proposed Committee recommended priorities to the AWC Board.

- The Committee agreed with most staff recommendations that these items should comprise our priorities and no NEW ones were suggested.
- Based on the discussions there was a general understanding that several of the issues can be “grouped” together
- The Committee wants to be engaged in putting meat on the bones on several items (examples include making sure we have the right mix of local option transportation items and what the list of cost-driver solutions looks and feels like).
- The Committee understands the challenges of maintaining and restoring shared revenue and infrastructure resources, but urges AWC to not keep advocating for these absent some new ideas – including to be actively engaged in consideration of new revenues for the state.
  - The Committee asked to be a part of figuring out how best to do this over the coming months and staff agreed.
- AWC and city officials at home need to better articulate the consequences of funding cuts and the benefits of continued or restored funding.
- AWC needs to figure out how best to engage the Committee both during the November meeting and after the 10/3 Board meeting. They have useful strategy input and suggestions.

Based on the Committee’s discussions, staff has prepared the following recommendations (still in no particular order) to forward to the Board of Directors for consideration for adoption as AWC’s 2015 Legislative Agenda priorities.

**Maintain Existing State-shared Revenue**
Work to maintain existing state shared revenue and oppose any further cuts. Cities are willing to work with the State to explore ways to ensure that this funding remains available to the jurisdictions that rely upon it. In addition, continue to seek restoration of diverted liquor taxes and removal on the cap on liquor profits.

**Exploring new revenue options and greater flexibility:**
Cities will explore the possibility of new revenue opportunities to fund needed local services and look at options for creating greater flexibility within existing funding sources. Options may include:

**Lift the 1% Property Tax Cap**
Cities support revisiting the local government 1% property tax revenue limit to determine if there is a better local option approach that will balance the public’s desire for property tax limitations with the reality of keeping pace with funding service needs.

**Greater Authority and Flexibility for REET**
Explore potential REET changes as an option for enhancing needed infrastructure funding and maintenance
Maintain and Restore Funding for Infrastructure
Stop divestment in programs that support basic local infrastructure, and have the State commit to a pathway to restore historic levels of investment and partnership in these key programs. Cities and the State must continue to partner on emerging infrastructure challenges to build strong communities and economic opportunities that generate jobs and revenue. Cities are willing to work with the State to explore ways to fund this important priority.

Transportation Funding
AWC supports a multimodal statewide transportation revenue package with a direct distribution of gas tax at historical percentages; an array of local transportation revenue options; and increased funding for important state grant programs (TIB, FMSIB, Safe Routes to School, Bike/Ped, Complete Streets). In the event, however, that a statewide transportation package does not pass, AWC will advocate for new and enhanced local transportation revenue options and for the state and will seek to refrain it from transferring funds out of programs that benefit locals, such as TIB, to state transportation programs.

In addition, AWC will advocate for and support improved freight rail safety including additional funding at both the State and Federal levels.

Marijuana
Preserve existing local regulatory authority over marijuana related businesses and share marijuana excise tax revenue with cities to address criminal justice needs and other local impacts.

- Cities oppose any preemption of local authority over traditional land use, licensing, local taxes and fees, and other regulatory functions in regards to marijuana production or distribution.
- To support the success of I-502 and diminish the impact of the illegal market, cities need a share of anticipated I-502 revenues to cover efforts on education and criminal justice.
- Cities support reconciling the recreational and medical marijuana markets to ensure legitimate patient access, enforceability and compliance with federal expectations.

State Imposed Cost Drivers
- Cities oppose creation of NEW cost drivers without accompanying revenue.
- Cities will seek opportunities to address existing cost drivers and promote changes that would eliminate or lower the impact of such cost drivers.

The following issues were discussed, but based on Committee discussion and staff recommendations, they were deemed not yet ready to be advanced as priorities at this time.

- Clarify city utility tax authority on water & sewer districts serving city customers
- Public Defense Funding
